GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and per 1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

June 16, 1999

Attn: Mr. Koso Nodohara  
State Water Resources Control Board  
Division of Water Rights  
P. O. Box 2000  
Sacramento, CA 95812-2000

Subject: Supplemental Statements for Years 1996, 1997, 1998

Statement Nos. S001453  
S001454  
S001455

For Child-Bowley-Calkins Ditch Owners:

(1)	Albert E. Puhlman, Jr.	33.33%
(2)	George Fenimore, III	33.33%
(3)	Charles Bull	22.22%
(4)	Elwood Ford	7.41%
(5)	Jeff Lambert	3.70%

Dear Mr. Nodohara,

Enclosed you will find the noted supplemental statements. Please note the corrections to the owners of record. These five owners of the Child-Bowley-Calkins Ditch and their predecessors have had uncontested use of the diversions noted for 115 years.

For the record, all owners are shown on this statement. I have shown the other statement Nos. that are covered by this statement:

George Fenimore, III	S010423
	S002594
Charles Bull	S002593
Elwood Ford	S002595
Jeff Lambert	S010863

SEP 13 1999

7/26

I have advised all of the owners that you have agreed to accept statement Nos. S001453, S001454, and S001455 as a report to cover all statement numbers collectively, since they all refer to the same ditch and diversions.

If I do not hear from you in the next 30 days, I will consider the information contained herein acceptable and all future statements will reflect the proper owner names.

Thank you.

Sincerely,

Albert E. Puhlman, Jr.

Dear Mr. Koso Nodohara:

I am submitting the enclosed Supplemental Statement of Water Diversion and Use forms for 1994, 1995 and 1996.

Please note the corrections highlighted adding names to the Owner of Record. These six owners of the Childs-Bowley-Calkins Ditch and their predecessors have had uncontested use of water from the diversions noted for 113 years. This amendment will now show all of the owners on one statement.

Please contact me at (916)337-6885 if you have any questions.

If I do not hear from you in the next 30 days, I will consider the amendment accepted and all future statements will reflect the additional owners.

Thank you.

Very truly yours,

  
Albert E. Puhlman, Jr.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

### "Statements of Water Diversion and Use"

**"Information Pertaining to Water Rights in California"**

### "Water Rights for Stockponds Constructed Prior to 1969"

Subject: Supplemental Statement of Water Diversion and Use

Dear Mr. Rowlands:

Per our telephone conversation this morning, I have attached a copy of a letter sent to your office dated July 12, 1996, to which, we have not received a response.

We request that frequency and date of reporting be changed so that all diverters of record for the CHILDS - BOWLEY - CALKINS DITCH can submit statements at the same time in the future.

Thank you for your prompt attention to this matter.

Sincerely,

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

STATEMENT OF WATER DIVERSION AND USE

S 1453

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Wilbur J. Spaulding  
Address 2551 Mtn. Blvd., Oakland, California 94611
- B. Name of body of water at point of diversion See Exhibit A and Terry Tract Map attached.  
Tributary to See attached Terry Tract Map
- C. Place of diversion 1/4 1/4 Section        Township        Range        B&M,  
SHASTA County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

- D. Name of works Childs, Bowley, Calkins, Ditch

- E. Capacity of diversion works Total flow at diversion points

Capacity of storage reservoir 5000 Gallons

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
					X	X	X	X	X	X			

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. 60 acres

Alfalfa and 8 acres orchard.

Maximum annual water use in recent years Estimated 75 million

gallons  
acres

Minimum annual water use in recent years Estimated 52 million

gallons  
acres

Type of diversion facility: gravity X, pump

Method of measurement: weir, flume, electric power meter, water meter, estimate.

- F. Purpose of use (what water is being used for) Irrigation of crops.

- G. General description or location of place of use (use sketch of section grid on reverse side if you desire)  
N. E. 1/4 Section 17 T 34N R1E MP 13 + 14 R1E

- H. Year of first use as nearly as known 1897

- I. Name of person filing statement Wilbur J. Spaulding

Position Owner Organization

Address 2551 Mtn. Blvd., Oakland, California 94611

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.
